Appl. No. 09/977,261 Atty. Dkt. No. 034536-0219 (formerly 038602/1259)

ABSTRACT

The present invention relates to novel cytoplasmic tyrosine kinases isolated from megakaryoctyes (megakaryocyte kinases or MKKs) which are involved in cellular signal transduction pathways and to the use of these novel proteins in the diagnosis and treatment of disease. The present invention further relates to specific megakaryocyte kinases, designated MKK1, MKK2, and MKK3, and their use as diagnostic and therapeutic agents.
